PROFESSIONAL SUMMARY

Software Engineer with 4+ years building high-scale AWS cloud infrastructure for enterprise banking and Fortune 500 systems, cutting cloud costs by 35% and boosting performance by 40%. Designed AWS architectures (EC2, Lambda, S3, RDS, EKS) sustaining 99.9% uptime, implemented IaC with Terraform and CloudFormation reducing provisioning by 60%, and built CI/CD pipelines cutting release cycles from weeks to days.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, Lambda, S3, DynamoDB, RDS, EKS, CloudWatch, API Gateway, VPC, IAM), Microsoft Azure, OCI

DevOps & IaC: Terraform, CloudFormation, Jenkins, GitHub Actions, AWS CodePipeline, Docker, Kubernetes, CI/CD

Development: Java, Spring Boot, Spring Security (OAuth2/JWT), Python, JavaScript, React, REST APIs, Microservices

Data & AI: PostgreSQL, MongoDB, Redis, DynamoDB, Generative AI, OpenAI API, LLM Integration

Security & Monitoring: IAM, OAuth2, JWT, SOC2, PCI-DSS, AWS Well-Architected Framework, CloudWatch, SNS Alerting, Disaster Recovery (15-min RTO)

CERTIFICATIONS

AWS Solutions Architect Associate • Microsoft Azure Developer Associate (AZ-204) • Microsoft Azure Fundamentals (AZ-900) • Microsoft Azure AI Fundamentals (AI-900) • Oracle Cloud Infrastructure Foundations • AWS Cloud Virtual Internship (AICTE)

WORK EXPERIENCE

Software Engineer | Capital One | Dallas, TX | Jul 2025 – Present

- Architect and maintain AWS cloud infrastructure (EC2, Lambda, S3, RDS) for enterprise banking systems, sustaining 99.9% uptime across mission-critical workloads
- Automate infrastructure deployments using Terraform and CloudFormation, reducing provisioning time by 60% and enabling developer self-service across 5 engineering teams
- Implement CI/CD pipelines with Jenkins and AWS CodePipeline, cutting release cycles from 3 weeks to 2 days and reducing deployment failures by 70%
- Design disaster recovery solutions with 15-minute RTO using VPCs, security groups, and IAM policies, meeting SOC2 and PCI-DSS compliance requirements
- Optimize AWS spending through strategic cost analysis and rightsizing, lowering monthly cloud expenses by 25% (~\$40K annual savings)

Software Engineer | Accenture | Hyderabad, India | Jul 2021 – Jun 2023

- Designed and deployed microservices on AWS (EC2/EKS) serving 2M+ users, achieving 99.9% uptime for Fortune 500 financial services clients
- Built secure REST APIs with Spring Security (OAuth2/JWT) processing 500K+ daily API calls, reducing authentication failures by 85%
- Automated infrastructure provisioning with Terraform, cutting environment setup time by 50% (from 8 hours to 4 hours) for development teams
- Created CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time from 4 hours to 15 minutes and cutting release errors by 90%
- Tuned PostgreSQL and DynamoDB through query optimization and Redis caching, speeding API response times by 40% and cutting DB load by 60%
- Built CloudWatch dashboards and alerts detecting incidents 3x faster, resolving 200+ incidents and delivering 15+ AWS Well-Architected workshops to 5+ junior developers

Associate Software Engineer | Accenture | Hyderabad, India | May 2020 – Jun 2021

- Built serverless data-processing workflows with AWS Lambda, API Gateway, and S3 handling 500K+ daily events, reducing infrastructure costs by 30% versus EC2-based solutions
- Developed ML-enabled applications with pattern recognition and predictive analytics, processing 500K+ transactions daily for enterprise clients
- Created CodePipeline and Jenkins workflows that reduced release errors by 85% and made deployments 60% more predictable through automated testing
- Improved SQL query performance by 50% via strategic indexing and tuning, while CloudWatch and SNS alerting cut MTTD by 70% and prevented 95% of outages

EDUCATION

University of Missouri-Kansas City, MO

Masters in computer science

Aug 2023 – May 2025
